Tech Used: { React.Js & Redux.Js | HTML & CSS | Node.Js & Express.Js
Massive.JS | Postgresql & AWS S3 | Digital Ocean Droplets | Nginx }

- Worked on the backend mostly. Built the psql database and a portion of the server endpoints with corresponding frontend content, along with the filesystem and nginx reverse proxy.
- Learned how to work in a team using git as our version control.
- Was in charge of building and maintaining the database, file system, and deployment, was able to take code from my coworkers and make it buildable and deployable.
